I can't remember if I gave this to you already. I attached HD's decision doc for Cummins and our LD (HD chassis) decision document of Ford.

Apparently I will be meeting with CARB to discuss the GM SCR system tomorrow at 4:30. If either of you are available to participate that would be fine, if not, let me know what you think of the material they provided.

Steve,

What has GM provided to us in the way of describing their SCR system? Also, could you please work with Chris on developing a "decisions document" for the GM diesel. You may also want to talk to Jason Gumbs, since he is doing similar work for the incomplete engine families. Come talk to me and we can discuss this further.

Thanks,
Linc

~~*~*~*~*~*~*~*~*

We'll have the SCR discussion with GM. I'll attach our proposal to GM and any response when I get them. I'll get a conf call in line.

Linc, fyi, I'm not sure of the comments you've provided GM on their system so far. You are welcome to join us.
